Re: Propose Indiana Rules Controlling Lake Michigan Pollution

Attention: Mary Ann Stevens, Rules Division Director

Dear Sirs and Madams:

I am advised that federally mandated rules for controlling Indiana regarding water pollution of Lake Michigan are being considered at Indiana Department of Environment Management. I urge the body which will approve the rules to include strong and specific prohibition against all input of phosphorous, sediment or other key pollutants into Lake Michigan. Exemptions should be disallowed.

I am sure that I speak on behalf of many environmental organizations and tens of thousand of people interested in preserving the quality of water in the Great Lakes water basin.

I would appreciate hearing from you regarding the results of your conference.

Sincerely yours,

*Robert W. Landry*
